

VETM*3430 CLINICAL MEDICINE I

LARGE ANIMAL PHYSICAL EXAMINATION LABORATORY

LABORATORY OBJECTIVES:

Physical Examination of Horses:

At the completion of this lab and following review of the prescribed material available on the course website, the student should be able to:

1. Safely, effectively and efficiently perform a systematic and thorough general physical examination of horses.
2. Identify the gender of a horse, using appropriate equine terminology.
3. Properly use the vocabulary defined in the Glossary of Equine Terms.

Prescribed Materials (available on the course website):

- Physical Examination of Horses (lecture slides and detailed notes handout)
- Glossary of Equine Terms

Bovine Physical Examination:

At the completion of this lab and following review of the prescribed material available on the course website, the student should be able to:

1. Safely, effectively, and efficiently perform a systematic and routine physical examination of cattle.
2. Be able to properly use the vocabulary defined in the “Glossary of Dairy Terms”.

Prescribed Reading (available on the course website):

- Physical Examination of Cattle (lecture slides and detailed notes handout)
- Glossary of Dairy Terms
